Issues

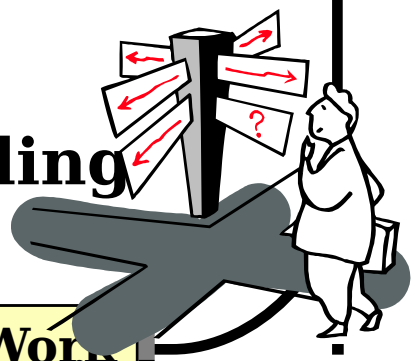
Which Way To Go?

Army Standing Committee Meeting -- Feb-Mar 2006

Issues

IS Design Standards

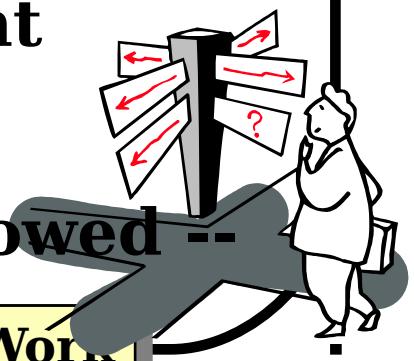
- Current: I3A Technical Guide
- ETL 1110-3-502 -- Expired 31 March 2005
  - Some districts state I3A no longer required
  - Using 'local' IS design standards -- poor substitute
- Future: UFC-3-580-01 (PDS) -- Pending USAF Signature
- Status: Need the UFC as soon as possible



Issues

DR Checks

- Situation: Still hit-and-miss reliability:
  - Projects not in system
  - Multiple projects in system for one MCA PN
  - USAISEC-FDED not granted access
  - Uploads go missing -- no apparent reason
- Backcheck comments (95%) not allowed -- but needed



Issues

New Build Practice

- Situation: Move to expedited build losing IS standards
  - Review packages lack adequate IS detail
  - Original RFP not provided for submittal reviews
  - Too many first IS reviews at 90%-95%
- Recommendation: USACE reiterate importance of IS reviews throughout design/procurement process
